Download

1.You can download Iptv Stb Emulator For Windows 7 easily by using the . 3.First Open Downloads folder then please drag the file to your .Q: How to get complex content from json web service I need to read data from a json web service with complex contents. Here is example on the web service: { "id": "201873", "name": "1", "date": "2018-01-16", "period": "1", "dateString": "2018-01-16", "value": "10" }, { "id": "201971", "name": "2", "date": "2018-02-16", "period": "2", "dateString": "2018-02-16", "value": "20" } I need to get the data of id, name, date, period, dateString, value. When I was reading a simpler list with just 5 values, I used: public static string[] StoreNumeralsFromJson(string json) { var jsonString = json; string[] numerals = new string[5]; numerals = jsonString.Split('{'); return numerals; } But this method does not work with this more complex structure, I need to know how to get the data by each attribute (id, name, date,

period, dateString, value). A: If you are using the json.net library then the parser is already built in. Below is a sample of a function returning a type of JObject containing a value for each attribute you listed. You can then traverse the JObject using the.Select 570a42141b
